

LUXURY HOME LIFTS

Est. 1898

KALEA 
LIFTS

THE KALEA LIFTS HISTORY

...STARTED IN GOTHENBURG IN 1898

Gothenburg was Sweden's leading port at the time, with a whole industry built upon ship-building and trading. Kalea started off as a key supplier of electrical equipment, before developing challenging lifts for ships, and then branching off completely into the lift market.

EXPANDED THROUGH EUROPE

Following the launch of our Generation 1 screw-driven lift, Kalea saw a period of hyper-growth throughout Europe, selling in France, the UK, the Nordics and more. Our network, combined with our increasing focus on design and luxury materials, is what led to...

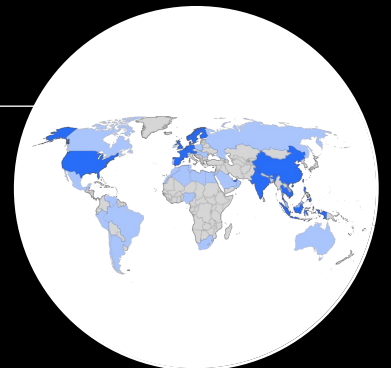

... BECAME A PART OF CIBES GROUP

As part of the consolidation going on in Sweden, and due to the high level of complementarity between Kalea and Cibes, we were acquired by the Cibes Lift Group, to better serve the growing high-end home lift segment.

... EXPANDED ACROSS THE WORLD

Within the Cibes Lift Group, Kalea's presence across the world exploded, with sales in over 70 countries and a wide new range of models developed to better serve our high-end customers.

GREAT DESIGN LASTS
FOREVER

Over a century of experience has taught us the importance of timeless design.

Given that a Kalea Lift can last for decades, we want to make sure that it is as high-end and trendy in 2025 as it is in 2050.

That's why at Kalea, we put such a focus on **quality materials**. Whether it be luxurious leather imported from Italy or high-quality vinyl sourced for its focus on eco-friendliness, we make sure that every item of our lift is top-notch and safe for our customers' homes.

In fact, we choose our partners with such precision that we are proud to display their names alongside our own – as their values are aligned with ours.

Design that lasts forever: Kalea Lifts.

SWEDISH DESIGN

SAFETY FIRST

EUROPEAN SAFETY STANDARDS

We believe safety is paramount, and that is why every single one of our lifts is carefully designed to respect the strictest of European standards – and most importantly the EN 81-41 machine directive. All of our lifts, regardless of design or model, offer the same level of unparalleled safety.

We never compromise on safety.

24 / 7 SERVICE NATIONWIDE

We believe in the value of local. Beyond our 24/7 hotline, we keep an ample local supply of spare parts and have technicians on call around the country in case of emergencies.

In fact, we are so determined to be there for you in case of emergencies that **we check if your elevator phone is active every day** through a discrete ping, and alert you if it is not.

SAFETY-FOCUSED IN-DEPTH MAINTENANCES

Our maintenances are thorough and complex. Rather than a simple check, we make sure that every single safety function, including sensors, emergency stops, brakes and more is 100% operational.

More than simply extending the lifetime of your lift, our maintenances are a key part of our safety promise.

ANTI-TRAP SYSTEM FOR EMERGENCIES

As a home lift company, safety is our main concern.

This is why our lifts come equipped with an anti-trap system consisting of a battery-powered emergency lowering system in case of blackouts, a reset button, emergency manual openings and for our generation 4 lifts, a manual lowering directly from the pit!

We have you covered!

CUTTING EDGE TECHNOLOGY GENERATION 4 SCREW LIFT

GEN 4

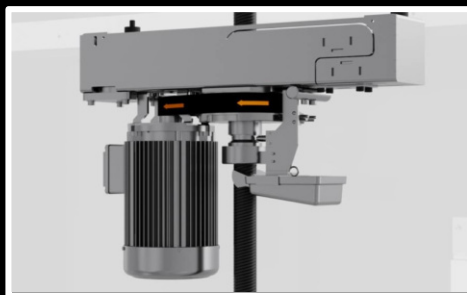

ECOSILENT 2.0

VIBRATION PROOF EXTRA SILENT

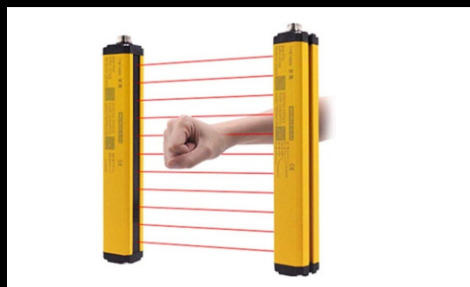

Thanks to the new XL Rubber Rollers, enjoy a silky smooth ride with no oil and sound levels as low as 40 dB

FASTER & BETTER DRIVE SYSTEM

Our new drive system allows for speeds of up to 0.25 m/s while ensuring strength and reliability for up to 20m travel heights!

1st CLASS SAFETY SAFER THAN EVER

Between our cutting-edge light curtain, our phone system or our anti-trap system, the Kalea Gen 4 is the safest lift we have ever built.

THE STRICTEST OF STANDARDS

Our lifts come TUV Sud-certified, ISO 9001 certified and certified by the LiftInstituut, Europe's leading agency specialized solely in lift certification

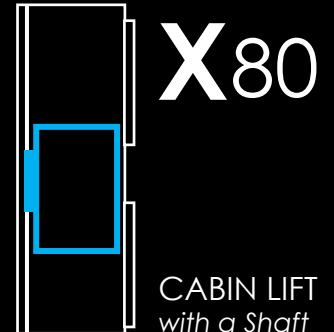

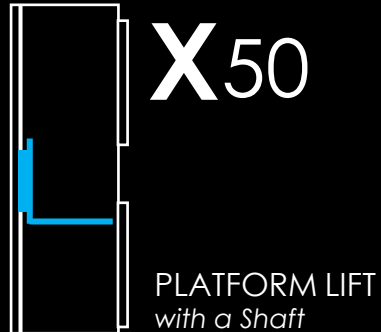

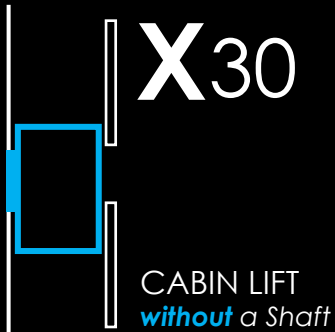

TIMELESS QUALITY, TIMELESS DESIGN

KALEA LIFT RANGE

HOME LIFTS

Our Home Lifts differ from traditional lifts in a few key aspects: we focus on saving more space, we offer glass as a default to create more light and room, and we put a big emphasis on looks, appearance and customization. With Kalea, you aren't buying industrial equipment. You are getting a wonderful lift that will match and integrate into your home's beautiful aesthetic.

HOME LIFT RANGE X30

Our X30 range is perfect for homes with an existing shaft. Our unique screw-drive technology provides not only far more standing space than traditional lifts, but also an unparalleled level of design.

- Comes with **Kalea Steel Side on Door Side** for a beautiful travel view through our bi-folding doors or light curtain, standard across all trims
- Finished shaft as small as 1000 x 900 and as large as 1500 x 1400, with up to 73% standing space utilization. Comfortably fit 2-6 people!
- Available in 3 trim levels, with upgrade to Pro for those preferring Saloon Doors for that extra luxurious touch!
- Installation in only 7-14 days depending on height and site location, thanks to innovative Kalea installation process
- EcoSilent 2.0 technology as standard, for a silky smooth ride, lower maintenance and a lift that will last for decades.

HOME LIFT RANGE

X50

Our X50 range is our best-selling range, as it comes with a platform and a full Infinity Glass Shaft as standard. Perfect for middle of the stairs or any type of setting where 360 panoramic views are a must.

- Comes with **Kalea Infinity Glass Shaft** (2,000 mm sections with our micro separator for full 360 degree panoramic view) standard across all trims
- Finished shaft as small as 1000 x 900 and as large as 1500 x 1400, with up to 73% standing space utilization. Comfortably fit 2-6 people!
- Available in 3 trim levels, with upgrade to Pro for those preferring Saloon Doors for that extra luxurious touch!
- Installation in only 7-14 days depending on height and site location, thanks to innovative Kalea installation process
- EcoSilent 2.0 technology as standard, for a silky smooth ride, lower maintenance and a lift that will last for decades.

HOME LIFT RANGE X80

Our X80 range is our highest-end range, as it comes with both a cabin and a full Infinity Glass Shaft as standard. Perfect for existing homes where no lift was planned for, or for centerpiece lifts to bring elegance and style to your design.

- Comes with **Kalea Infinity Glass Shaft** (2,000 mm sections with our micro separator for full 360 degree panoramic view) standard across all trims
- Finished shaft as small as 1000 x 900 and as large as 1500 x 1400, with up to 73% standing space utilization. Comfortably fit 2-6 people!
- Available in 3 trim levels, with upgrade to Pro for those preferring Saloon Doors for that extra luxurious touch!
- Installation in only 7-14 days depending on height and site location, thanks to innovative Kalea installation process
- EcoSilent 2.0 technology as standard, for a silky smooth ride, lower maintenance and a lift that will last for decades.

SHAFT OPTION	Shaftless (X30) / Panoramic (X80)	Panoramic (X50)
LOCATION	Indoor or Outdoor	
SPEED	0.15 m/s / 0.25 m/s (with 3 phase)	0.15 m/s
GLASS	Tempered & Laminated	

WHAT ABOUT SPEED?

0.15 m/s

Our standard and recommended speed for optimal operation.

0.15 m/s is the speed that is recommended by the EU En81-41 machine directive for our range of platform lifts, which we also extend to the X30 / X80 products.

0.25 m/s

Thanks to our cabin design and light curtain safety edges, we are able to offer a faster speed of 0.25 exclusively on the X30 / X80 line without compromising safety in any way.

Enjoy a faster ride in full safety!
